

CASE STUDY

Built-up Felt Roofing

Willow Court N12

Background

Willow Court is a residential block of apartments situated in London, N12. The existing mastic asphalt system had come to its end of lifespan, but no water ingress was found.

Solution

Although the present asphalt system was coming to the end of its lifespan, it was in a suitable condition to receive a single layer overlay. All chippings were removed and the asphalt surface was checked for cracks, blisters and slumping at details.
