

## FireStop20

## Professional GRP. Midlands.

### Background

Client requested a cold applied weatherproofing system to be used on their deluxe holiday homes for the UK and mainland Europe market. Once 2 units are completed, they are shipped to their destination, where they are connected together using a GRP expansion joint.

### Solution

As these holiday homes are a new build project, FireStop20 Professional GRP is the perfect system, allowing a quick and easy waterproofing solution matching clients requirements.

### System

Upper photograph shows the application of base layer, lower photograph shows the application of top coat.
